

agnieszka malik

PRODUCT DESIGNER, UX DESIGNER (6 YEARS EXP.)

I focus on data-driven product development taking ownership of the complete design process. From discovery and research, through UX to delivery, I shape products that work for users, business, and technology (using AI where it makes sense).

skills

Frameworks and methodologies

Strategic and discovery frameworks
- Product discovery
- Product strategy
- Human-Centered Design (HCD)
- Jobs-to-be-Done (JTBD)
- Opportunity Solution Tree (OST)

Execution and structural frameworks
- Information Architecture (IA)
- Design sprints

Core Competencies
- UX Design
- Workshop facilitation
- UX Research planning and execution
- Mobile app design
- AI Technologies
- Product analytics
- Design Systems
- Atomic design
- White-label solutions
- AI Prototype evaluation

Tools: Figma, Miro, Framer, Mermaid, Mixpanel, JeffAI, Viktor

experience

Product Designer, UX Designer | SYZYGY Warsaw (Apr 2022 – Present)

Beyond core product design, helped define organizational AI standards, shaped the "buddy" role in a teal organization, hosted AI podcasts, contributed to the Travel & Tourism expert group (including interviewing aviation expert Iztok Franko), and authored technical app articles.

AI Assistant Project (Global construction industry leader)
Conducted an end-to-end discovery process, utilizing an Opportunity Solution Tree to map the pain points of professional contractors. Translated research insights into data-driven Proof of Concept (PoC) designs, validating usability directly with users.

Q-commerce app (Poland's largest discount grocery retailer)
Lead the from-scratch design of a new mobile app, built information architecture of the app, co-created components library

Lufthansa mobile app
Designed key features supporting passengers in edge cases (e.g., delayed baggage reporting system) and a Live Activities module utilizing the Dynamic Island. Conducted extensive UX research to eliminate friction points, reducing customer service workload and contributing to the app winning an award at the World Aviation Festival 2024. Co-created white label design system for Lufthansa, Austrian, Brussels and Swiss Airlines.

Product Designer | Sektor 3.0 (2024)

Provide expert guidance to teams during a 14-week incubation program, helping them validate assumptions, conduct user research, and design digital solutions with solid market foundations.

Co-founder & UX/UI Designer | MakroMapa (May 2019 – Jul 2022)

Built and scaled a proprietary macronutrient tracking app in Poland. Managed the entire product lifecycle: from information architecture, through interactive prototyping and hypothesis validation with an engaged community, to a scalable component library.

Architect (2013 – 2022)

Spent nearly a decade designing complex spatial structures at APA Wojciechowski, building an analytical framework and structural mindset that now drives digital product architecture. This architectural career culminated in earning full, unrestricted design credentials—the highest professional license in the industry.

education & certifications

Master of Science in Architecture and Urban Planning | Silesian University of Technology (2010 – 2016)

Certifications:
- AI Product Heroes PL
- Product challenge 03 - hackaton: Lean inception
- Product Analytics Academy (Product Academy)
- Using AI in Business Development (Google)
- Introduction to Web Accessibility (edX)
- Complete Web & Mobile Designer: UI/UX, Figma (Udemy)
